

HYDRAULIC SHIFTING CLASS 2 ITA FORKS

ONLY FROM
MDS
MANUFACTURING CO., INC.

AMERICAN MADE

Euro

Global/Classic

Built to strict ISO specifications. **MDS Class 2 ITA Pallet Forks System with Hydraulic Shifting Forks for Universal Skid Steer, Euro/Global, and JD Classic** saves valuable time by not getting in and out of the cab to adjust the forks.

MDS offers Class 2 ITA Pallet Fork Systems for over 100 loader applications including Universal Skid Steer, Euro/Global, JD Classic, and many more. Standard fork is fully heat treated, 1½" x 4" x 48" rated at 5500 pounds with a 24" load center. 60" and 72" forks are also available. Yellow tines shown for demonstration purposes only. All tines on all frames are black in color.

Universal Skid Steer

Carefully routed hoses are tucked away and securely fastened to the frame. 100% assembled at MDS Manufacturing.

MDS welds the cylinder mounting brackets on the forks and the frame. MDS uses (2) 1½" x 16" cylinders. Cylinders close to within 3" of each other.

Frames are shipped with hose guards. 72" hoses and couplers are included for Skid Steers. Add your own hose kit for tractor loaders.

Keep the fork rail greased for years of trouble free use and smooth fork sliding.

Cascade's quality system offers full traceability throughout the entire production history of each fork manufactured, from raw material through final inspection. Each fork is stamped with Cascade's identification, specified capacity, load center, week of manufacturing and production work orders. This traceability together with Cascade's strictly controlled processes ensure that only forks of the highest quality reach our customers. Yellow and red highlighted components are shown for display purposes only. All hydraulic shifting options are shipped black.
